

Introduction

The U.S. Department of Agriculture - National Agricultural Statistics Service - Utah Field Office (Utah Agricultural Statistics) and the Utah Department of Agriculture and Food are proud to provide the 37th edition of this publication. Copies of the publication are also available on both of our Internet sites and also on a CD. Information in this publication is provided to help inform farmers, ranchers, and the public about activities within the Utah Department of Agriculture and Food, and provide a detailed look at Utah's agricultural production. Also included are budgets for helping farmers and ranchers evaluate the potential profitability of various agricultural commodities.

Estimates presented in the publication are current for 2007 production, and January 1, 2008 inventories. Data users that need 2008 production information or additional historic data should contact Utah Agricultural Statistics at 524-5003 or at 1-800-747-8522.

State and U. S. statistics are available on the NASS Web page at <http://www.nass.usda.gov/>. You can find commodity estimates by selecting "Commodity" under the "Find NASS Publications" icon, select the desired commodity, and then select the NASS report wanted. You can also use the "Quick STATS" selection on the home page to access historic data. You will find it quite an interesting way to gather data. The data found can be downloaded as a zipped ".CSV" file and imported into a spreadsheet for your processing needs.

Cooperation from farmers, ranchers, and agribusinesses responding to various survey questionnaires is essential to quality estimates. We thank them for their help and willingness to provide individual operation data. We pledge to keep their individual operation data confidential.

Our National Association of State Departments of Agriculture (NASDA) enumerators collect most of the data on our surveys. I enjoy talking to farmers and ranchers and hearing about their experiences with our enumerators.

Prior year estimates are subject to revision and may have been revised in this publication. Data users should use this publication for previous years' data and not go back to earlier publications for those data.
